AppleShare Print Server 2.0 Requires Laser Prep File (8/93)

Article Created: 30 August 1993

TOPIC -----

Our AppleShare Print Server software no longer runs on a network where all workstations (and by necessity the print server as well) are running the 7.x versions of the LaserWriter drivers.

DISCUSSION -----

Since AppleShare Print Server 2.0 requires the Laser Prep file, the the Prep file has been updated specifically for AppleShare Print Server 2.0 only. You'll find this updated file on the Printing Tools disk that comes with System 7.x. Replace the file on the print servers in the System Folder with this file. Don't put the Prep file on the workstations, only on the print server.

Note: The Laser Prep file was rolled into LaserWriter Driver version 6.1 and later. The Laser Prep file was required with printer driver versions 6.0 and earlier.
