StyleWriter GX Drivers: Don't Support Scatter Feature (7/96)

Article Created: 19 July 1996

TOPIC -----

I am using QuickDraw GX and a Color StyleWriter 1500 printer. I am trying to use the Scatter mode, but that button is not active. How can I use this color mode with QuickDraw GX?

DISCUSSION -----

The StyleWriter GX drivers do not support the scatter feature, with the exception of the StyleWriter Pro GX driver. Since most StyleWriter customers do not need the higher end printing architecture of QuickDraw GX, many of the features of GX, such as DeskTop printing, N-Up and Watermarks, have been incorporated into the standard QuickDraw drivers.
