StyleWriter II: Executive Paper Size (2/95)

```
Article Created: 25 March 1993
Article Reviewed/Updated: 16 February 1995

TOPIC -------------------------------------------------------------

The StyleWriter II manual states that the Executive paper size is 7.5-in.w
by 10.5-in.h, but the Page Setup dialog shows it as 5.5-in.w by 8.5-in.h.

Which one is correct?

DISCUSSION --------------------------------------------------------

You are correct that the manual states one size for Executive paper, and the
StyleWriter II driver uses another. Version 1.2 of StyleWriter driver has been
changed to use 7.5-in.w x 10.5-in.h as the Executive paper size. Apple has
decided to standardize on that size for all Apple printers.

If you want to modify the StyleWriter II driver to use the 7.5-in.w by 10.5-in.h
paper size, the best way is to modify the StyleWriter II PREC id=3 resource.
Just change the paper height and width values of Btn 3 to 1260 (105x12) and 900
(75x12), respectively.

Article Change History:
16 Feb 1995 - Added version of driver that corrects issue.
08 Jun 1993 - Added width and height abbreviations.
