StyleWriter: Protect Ink Cartridge during Air Transport

Article Created: 1 May 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Low air pressure during air transport can cause ink to pump from the StyleWriter cartridge.

DISCUSSION -----

When transporting a StyleWriter printer by air, always remove the cartridge from the printer and then protect it.

The best solution is to carry a new cartridge still in its plastic carton.

To provide minimum protection, place the opened cartridge in a sealed plastic bag.
