StyleWriter: Use Of Power Converter Suggested Overseas

Article Created: 13 May 1991

Article Last Reviewed: 31 May 1991

Article Last Updated:

TOPIC -----

Is a power adapter or transformer necessary to use the StyleWriter in Europe and the Soviet Union? This is to convert 110/60 to 220/50.

DISCUSSION -----

While it is possible to run the StyleWriter on 220V/50Hz with the aid of a power converter (see the AppleLink Tech Info Article "Using Apple Equipment Overseas"), the cleanest solution would be to purchase an Apple AC Adapter (transformer) appropriate to the local power conditions.

Transformers of all kinds can be ordered by any Authorized Service Provider. The current service price list shows transformers available for the following areas:

USA	699-2050
Japan	J699-2050
UK	B699-2050
Australia	X699-2050
Europe	Z699-2050

If you don't have time for a local service provider to order the transformer, it can be purchased from an Apple dealer at your destination.
