TOPIC -----------------------------------------------------------

I use a StyleWriter printer.

When I print a self-test, the print is dark.  When I then print from the
computer, the print gets continuously lighter.

What can I do?

DISCUSSION ------------------------------------------------------

1. Purge the ink cartridge

2. Make sure you're using 16 lb. to 24 lb. bond paper.

3. Make sure forms-thickness lever is set in the UP position.

4. Replace the ink cartridge.
