StyleWriter: Use Driver 7.1 with IIf Card Software 2.0 and 2.0.1

Article Created: 29 January 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

We installed the new StyleWriter drivers and they work great on the Macintosh. However, we can no longer print from an Apple IIf card. We have a Macintosh LC 4/80 running AppleWorks 3.0 on the IIf card. We had no problems printing until we installed our driver update. The computer seems to communicate with the printer, then the computer locks up, and we have to restart.

DISCUSSION -----

If the new StyleWriter drivers are version 7.2 or 7.2.2, the recommendation is to use version 7.1 StyleWriter drivers with the Apple IIf Card software version 2.0 and 2.0.1. The 7.2 and 7.2.2 versions of the StyleWriter drivers haven't been tested with the Apple IIf Card software versions 2.0 and 2.0.1.
