## StyleWriter: Use ClarisWorks 1.0v3 or Later

Article Created: 6 May 1992

Article Last Reviewed:

Article Last Updated:

### TOPIC -----

I'm using ClarisWorks 1.0v2 on a Macintosh SE/30 running system software version 6.0.7. When I print to my StyleWriter, the first line of each paragraph (beginning with the second paragraph) is slightly indented. These indents vary from paragraph to paragraph.

When I print the same documents to a LaserWriter printer, the printouts are aligned properly.

### DISCUSSION -----

This is a known problem with ClarisWorks versions 1.0 and 1.0v2 when printing to a StyleWriter. Claris recently released version 1.0v3, which corrects the problem.

Contact Claris Customer Relations for a copy of the upgrade.

On AppleLink, you can find contact information on Claris Corporation by clicking the "Library Index" button in the lower-center of the Tech Info Library search window, then opening the "Third Party Company Directory" folder.
