## StyleWriter: How to Clean Ink Stains From the Platen

Article Created: 4 November 1992

TOPIC -----

How should I clean ink stains from a StyleWriter's platen?

DISCUSSION -----

If your StyleWriter's platen becomes stained with ink, you should first run a few sheets of clean paper through the printer. If this doesn't remove all of the ink, dampen a soft cloth -- with water only -- and wipe the platen clean.

Do not use any chemicals or abrasives on the platen, as they will deteriorate the platen surface.
