StyleWriter II: Software Install Error (8/94)

Article Created: 24 March 1994
Article Reviewe/Updated: 30 August 1994

TOPIC --

I'm trying to install StyleWriter II software from our original StyleWriter II
disks on a Power Macintosh 7100/66. I'm getting the following error when doing
an Easy Install:

"The selected disk has System 7 installed, the custom installation you have
selected is only for disks where System 6 is installed. Please click Switch
Disk to choose a different disk or insert a floppy disk."

DISCUSSION --

We were able to duplicate this problem, and most likely the original StyleWriter
II Installer script wasn't aware of the new Power Macintosh computers or new
system software. This issue can also arise on any computer introduced after the
StyleWriter II such as the PowerBook 500 series and 280/280c.

The latest StyleWriter II software (version 1.2) is on the Power Macintosh
Install disks, and is part of the Easy Install for the Power Macintosh as well
as being pre-installed on the PowerBook computers.

You might want to do a Custom Install, so that the additional fonts are
installed on your Power Macintosh. The fonts are the only things that you need
to install from the StyleWriter II software disks.

Article Change History:
30 Aug 1994 - Revised to show that issue can arise on any computer introduced
              after the StyleWriter II.
17 May 1994 - Included custom install information.
