Power Mac 5200 & 6300: PrinterShare Fails From Remote (11/96)

Article Created: 19 July 1996

Article Reviewed/Updated: 22 November 1996

TOPIC -----

I have two Power Macintosh 5200 computers and a Color StyleWriter 2500 printer. I am trying to share the printer, but when I print from the remote computer, I get a Resource not Found error message. I am using System 7.5.3 on both computers.

DISCUSSION -----

You can perform any of the workarounds listed below in order to print correctly. This problem is NOT specific to the Color StyleWriter 2500, and occurs with any QuickDraw printer that uses Printer Share 1.1.3.

Workarounds

=====

Upgrade to System 7.5.5

You can successfully use PrintShare on Power Macintosh 5200 and Power Macintosh 6300 series computers if you install the System 7.5.5 update.

Fill Out Information in Sharing Setup Control Panel

If you fill out the information in the Sharing Setup control panel, the necessary resources are installed, so PrintShare functions properly with System 7.5.3. Be sure to fill out the information in the Sharing Setup control panel of the remote computer also.

This article appeared in the 15 October 1996 issue of the Information Alley.

Article Change History:

22 Nov 1996 - Added Sharing Setup control panel on the remote computer.

15 Oct 1996 - Added current workarounds.
