QuickDraw-Based Printers Are Not Compatible With IBM PCs

Article Created: 14 January 1992

TOPIC -----

How can I connect a Personal LaserWriter LS to an IBM-compatible PC?

DISCUSSION -----

The Personal LaserWriter LS, Personal LaserWriter SC, LaserWriter IISC, and the StyleWriter are not compatible with IBM-compatible computers because they are QuickDraw-based printers.

IBM-to-LaserWriter connectivity requires a PostScript-based printer, like the Personal LaserWriter NT, LaserWriter IINT/IINTX, and LaserWriter IIf/IIg printers.
