System 6.0.7: Incompatible with PrintMonitor 7.1 2/93

Article Created: 3 February 1993

TOPIC -----

I just installed the PrintMonitor 7.1 on a 6.0.7 system. Upon clicking "Set Print Time," the system crashed.

DISCUSSION -----

PrintMonitor 7.1 went out with the bug you described for users running System 6. The problem won't occur with System 7.

For the time being, we recommend that system 6.x users install PrintMonitor 7.0.1 or 7.0. You can obtain a copy from your dealer. You can also find PrintMonitor 7.0.1 posted on AppleLink. The path is:

Software Sampler
 Apple SW updates
 Macintosh
 Printing Software

You should be aware that when installing with the LaserWriter Pro Series disks, they will always install PrintMonitor 7.1 over the older version. Remember to save a copy of the old PrintMonitor before beginning the installation.
