Macintosh Print Pack: Does Not Support HP Printers (9/95)

Article Created: 29 September 1995

TOPIC --

Is there a compatibility problem between the Hewlett-Packard Deskjet 500 series
printers and the Macintosh when using the Macintosh Print Pack?

DISCUSSION --

The Macintosh Print Pack does not support HP 500 series printers. The only
drivers that the Print Pack supports are those that provide full Epson
Emulation. The HP printers do not support Epson Emulation. There is a full list
of printers supported in the Print Pack documentation.

If you need this functionality for HP products, GDT Softworks, supports some
additional drivers including those for HP printers.

The Tech Info Library article titled "Locating Vendor Information" can help you
search for GDT Softworks' address and phone number.
